2610 JOURNEYMAN CHEST

THE STANDARD BEARER OF MACHINIST CHESTS

The Style 2610 Journeyman Chest is the most recognizable and sought-after design by Gerstner since its introduction in the 1930s.

The Style 2610 Journeyman Chest incorporates the timeless look and drawer layout of the Style 52 with added overall height and depth (front to back) for more usable storage. The center drawer, which was traditionally used to hold a Machinist's Handbook, can be upgraded to a locking drawer for additional security and peace of mind.

The taller and deeper drawer sizes make the Style 2610 Journeyman Chest a great chest to hold and display just about anything. The top compartment and all ten drawers are felt lined to provide extra protection for your possessions. The front panel is fitted with a sliding hinge so that it may be stowed beneath the bottom drawer. In the closed position, the front panel covers the drawers and can be locked to provide total security.

FEATURES

While all of these pieces are dramatic, they're strong investments because they'll never be out of place in the home. Gerstner chests are built to last, you can depend them for many years in a beautiful home.
